CVP IMPACK

Automate
your way
to more
profits

Reduce or eliminate void fill with a fit-to-size box, resulting in a better unboxing experience and a greatly reduced per-unit cost.

Build the best box around the contents.

Most businesses inventory numerous shipping box sizes. Hopefully, the packer selects the smallest box for the contents, but it may not be the smallest it could be. That means void fill material and airspace essentially add up to lost dollars. The CVP Automated Packaging Solution optimizes all steps of package fulfillment by creating fit-to-size boxes for variable-dimension single- or multi-item orders. With the CVP you can see a quick return on investment and stay ahead of the competition. Quadient is beyond the box, your business should be too.

Smallest Size

9.45" W X 7.09" L X 3.94" H

Largest Size

23.622" W X 23.622" L X 15.75" H

And all sizes in between

The CVP Impack Automated Packaging Solution.

See how the CVP saves you time and money.

Fit-to-size automated packaging technology measures, constructs, tapes, weighs and labels each parcel in one seamless process. It addresses key shipping industry challenges—from exponential increases in e-commerce orders to supply chain labor shortages and rising shipping volumes.

One, two or three corrugate feeders use fan-fold material for quick replenishment, reduced inventory and usage savings. We are agnostic to a fan-fold supplier.

Reduce labor costs by an average of 88% and ensure smooth workflows even during peak production periods.

Increase productivity as single- or multi-item orders are scanned and custom boxes are configured every 7 seconds.

Eco-friendly corrugate packaging and box size for a smaller carbon footprint.

Order weight verification optimizes rate shopping via an in-line scale, assuring accurate weight and measurements of each parcel.

Easy open box taped on 2 sides allows for painless returns or recycling, improving the customer experience.

What packaging challenges do you want to solve?

- Speed**
Time is money. Automated packaging will increase throughput while using less corrugated and void fill.
- Peak Seasons**
Every year customer demands get higher and companies are pushed to the edge. Alleviate peak season packing challenges with automated packaging.
- Sustainability**
While fast delivery times continue to be a focal point, consumers also want to purchase from eco-friendly companies. Automate your packaging to strengthen your green initiatives.

Single or dual induct stations to produce high-volume packing speeds.

Scanner captures 3D image of each unique order regardless of shape or texture to determine the minimum box size required.

Reduce DIM weight-dependent freight costs with the correct-sized box for every order.

Carrier compliant labels are created and applied to ensure accurate delivery.

Customer focused service solutions
Quadient offers remote support, on-site scheduled service calls, and a dedicated OEM parts distribution center.

About Quadient

Quadient is the driving force behind the world's most meaningful customer experiences. By focusing on four key solution areas including Customer Experience Management, Business Process Automation, Mail-related Solutions, Automated Packaging Solutions and Parcel Locker Solutions, Quadient helps simplify the connection between people and what matters. Quadient supports hundreds of thousands of customers worldwide in their quest to create relevant, personalised connections and achieve customer experience excellence. Quadient is listed in compartment B of Euronext Paris (QDT) and belongs to the SBF 120 index.
